Quang Le

Design Engineer & AI Product Designer

Design Engineer bridging UI/UX design systems (Figma) and production frontend code (Next.js, TypeScript) with AI workflows, technical SEO/analytics, and 8+ years of visual production.

SUMMARY

Design Engineer and AI Product Designer with 8+ years of experience combining end-to-end UI/UX design in Figma with production web engineering (HTML/CSS/JS, TypeScript, Next.js 15, Tailwind CSS, Python) and high-precision visual production. At Nhã Đạt, I design and ship web interfaces, optimize SEO and conversion funnels using Microsoft Clarity, Google Analytics (GA4), and Google Search Console, and build internal AI products (sales chatbots, CLIP/FAISS visual search, ComfyUI pipelines) on top of a 10,000+ asset archive.

TOOLS & STACK

Figma · HTML/CSS/JS · TypeScript · Next.js 15 · Tailwind CSS · Python · Supabase · Google Search Console · Google Analytics (GA4) · Microsoft Clarity · ComfyUI · Flow (Veo) · Seedance · Photoshop · Lightroom · Illustrator · InDesign · Premiere Pro

EXPERIENCE

Lead Visual & Design Engineer

Nhã Đạt — Residential Property Developer 2025 — present

- Design UI/UX interfaces in Figma and build responsive production web pages in Next.js/HTML/CSS; track user heatmaps, session recordings, and search performance via Microsoft Clarity, Google Analytics (GA4), and Google Search Console to optimize technical SEO and conversion rates.
- Structure and index a 10,000+ architectural photo archive, then engineer an internal AI sales chatbot and a content-based visual search tool (Python, CLIP, FAISS) that let sales staff retrieve project visuals by content in seconds.
- Lead end-to-end visual direction, architectural HDR photography, video post-production, and 2D/3D print collateral (brochures, banners, backdrops, standees) for two residential developments — Ny'ah Phu Dinh (50-unit compound) and Villa Ny'ah — managing color accuracy directly with print vendors.

Agricultural Trainee

Axel Månsson A/S — Denmark May 2024 — Sep 2025

- Operated for 16 months inside a high-technology Danish farming enterprise in an English-speaking environment under strict European process and safety standards.
- Produced aerial drone, photo, and video documentation of production sites while maintaining daily operational logs and production records.

Wall Tile Mural & Print Designer

Piramic Saigon 2022 — 2024

- Designed market-leading custom 3D wall tile murals and decorative ceramic panels using high-resolution composition and industrial color separation, helping the factory expand its nationwide dealer network and drive revenue growth.
- Standardized prepress RIP workflows and ICC color profiles before kiln firing and UV printing, minimizing color deviation across large-format production batches.

PORTFOLIO

quang-seven.vercel.app
linkedin.com/in/quangle507
github.com/quang507

SKILLS

UI/UX & Design Systems

Figma (Design Tokens, Variables, Auto-layout, Component Architecture), User Flow & Journey Mapping, Interactive Prototyping, Responsive Web/Mobile UI, Conversion Rate Optimization (CRO).

Frontend, AI Workflows & SEO

HTML/CSS/JS, TypeScript, Next.js 15, Tailwind CSS, Python, Supabase; AI Coding Tools, Gemini/Claude API, ComfyUI/ControlNet, CLIP/FAISS; Technical SEO, Microsoft Clarity, Google Analytics (GA4), Google Search Console.

Visual & Print Engineering

Architectural & Product Photography (HDR), Commercial Packaging & Dielines, Large-Format 3D Tile Mural Design, Industrial Print Color Management (Photoshop, Lightroom, Illustrator, InDesign, Premiere Pro, Flow/Seedance).

EXPERIENCE — CONTINUED

3D Tile Mural & Print Designer
Đức Phát 2017 — 2022

- Created signature 3D wall tile mural collections and custom architectural wall panels for villas and commercial projects, setting market trends that attracted new regional distributors for the factory and increased sales revenue.
- Managed 5 years of end-to-end print production on glass, ceramic tile, and UV surfaces, establishing strict color-matching standards from digital file to finished material.

Photographer & Retoucher
Viễn Đông Wedding Studio 2017 — 2018

- Shot studio and location photography and executed batch color grading, skin retouching, and print-ready album layouts for client delivery.

SELECTED PROJECTS

I design in Figma and ship working software in TypeScript and Python to solve real operational and marketing bottlenecks. Open-source repositories at github.com/quang507.

NhaDat Radar — AI Property Aggregator & Marketplace · nhadatradar.com
Designed the full UI system and built a Next.js 15 marketplace where Playwright crawlers pull 5 Vietnamese listing sources twice daily, a Gemini pipeline extracts structured pricing/ward data and flags inflated listings, paired with PostGIS map search and pgvector semantic search.
Figma · Next.js 15 · TypeScript · Supabase (PostGIS, pgvector) · Gemini API · Playwright

GÓI — Packaging Brand, Commercial Web & AI Quoting Bot · goi-v2.vercel.app
Designed brand identity, box mockups, and an 11-page commercial site in Figma and shipped it to production, integrated with a Python/Gemini quoting bot that parses plain-Vietnamese specs and calculates factory costing (paper weight, imposition, plates, press runs) validated against 1,400 sample orders.
Figma · HTML/CSS/JS · Python · Gemini API · Vercel

Finding Picture — Semantic Visual Search Engine · Finding-picture
Built a local visual search application indexing 10,000+ studio and architectural assets by subject, composition, and scene content instead of filenames, eliminating manual folder browsing for the marketing team.
Python · Streamlit · CLIP · FAISS · YOLO

Vietnamese Sign Language (VSL) — Browser AI Trainer · VSL
Engineered an interactive web application where learners practice sign language via webcam and receive real-time accuracy scoring entirely in the browser with zero server latency, including the custom training pipeline.
Next.js · MediaPipe · TensorFlow.js · Python

Scripted AI Video Production Pipeline · Flow · Seedance
Built a storyboarding and prompt-continuity workflow combining Google Flow (Veo) and Seedance with Premiere Pro grading and sound design to produce cohesive commercial short films and ad cuts.
Flow (Veo) · Seedance · ComfyUI · Premiere Pro · After Effects

Site Gate Vehicle Monitoring System · internal
Deployed an offline computer-vision pipeline on a 4G construction camera that tracks vehicle entry/exit direction, logs shift reports to Telegram, and self-retrains on staff-verified records.
Python · ONNX Runtime · RF-DETR · SQLite

Additional shipped tools: Zalo chat-first property assistant with Next.js CRM, QR maintenance & rating web app for a 50-unit residential compound, stock screener bot, and specialty coffee landing page.

EDUCATION

University of Transport and Communications — HCMC Campus
Construction Economics · 2014 — 2016
Completed 2 years of engineering coursework
