Quang Le

Design Engineer (UI/UX, Frontend & AI Workflows)

Design Engineer bridging User Interface (UI) & User Experience (UX) in Figma with production Next.js/TypeScript code, AI workflows, and data-driven Search Engine Optimization (SEO).

SUMMARY

Design Engineer combining User Experience (UX) research, User Interface (UI) design systems in Figma, and production web engineering (HTML/CSS/JS, TypeScript, Next.js). Having spent 8+ years mastering visual hierarchy, grid systems, and color accuracy across print and architectural media before building 14 shipped web/AI products, I ensure AI-assisted code maintains strict UI craft and usability. At Nhã Đạt, I map customer journeys, optimize Search Engine Optimization (SEO) and Conversion Rate Optimization (CRO) via Microsoft Clarity, Google Analytics 4 (GA4), and Google Search Console (GSC), and engineer internal AI tools over a 10,000+ asset archive.

CORE STACK

Figma · HTML/CSS/JS · TypeScript · Next.js 15 · Tailwind CSS · Python · Supabase · Microsoft Clarity · Google Analytics 4 (GA4) · Google Search Console (GSC) · ComfyUI · Flow (Veo) · Seedance · Adobe Photoshop · Lightroom · Illustrator · Premiere Pro

EXPERIENCE

Lead Visual & Design Engineer

Nhã Đạt — Residential Property Developer 2025 — present

- Design User Interface (UI) systems and User Flows in Figma and ship responsive Next.js/HTML/CSS landing pages; audit scroll heatmaps, session recordings, and search queries via Microsoft Clarity, Google Analytics 4 (GA4), and Google Search Console (GSC) to restructure mobile layouts, lifting scroll-to-form engagement by ~35% and ranking core project keywords on page 1.
- Taxonomy-tag a 10,000+ architectural asset library and engineer an internal AI sales chatbot plus a semantic visual search web app (Python, CLIP, FAISS), cutting sales team asset lookup time from 15+ minutes to under 2 seconds.
- Direct end-to-end visual campaigns, HDR architectural photography, and 2D/3D sales collateral for 2 residential developments — Ny'ah Phu Dinh (50-unit compound) and Villa Ny'ah — standardizing print color profiles across vendor runs.

Operations & Media Specialist (Trainee)

Axel Månsson A/S — Denmark May 2024 — Sep 2025

- Executed daily operational workflows and structured data logging in English across a 16-month placement inside a high-tech Danish enterprise, maintaining 99.5% accuracy and strict European quality compliance.
- Captured aerial drone, photo, and video field documentation across four seasons to support internal operations reporting and international recruitment.

Product Surface & Print Systems Designer

Piramic Saigon 2022 — 2024

- Researched interior market trends and designed 200+ flagship 3D wall tile mural collections using modular layout systems and high-resolution color separation, helping the factory expand its nationwide dealer network and grow wholesale revenue.
- Standardized prepress RIP workflows, digital catalogues, and International Color Consortium (ICC) profiles before UV/kiln production, shortening dealer order-closing time by 40%.

SKILLS

Research, SEO & Analytics

User Journey Mapping & User Flow · Usability & Funnel Analysis · Heatmap & Session Recording (Microsoft Clarity, Google Analytics 4 / GA4) · Technical Search Engine Optimization (SEO, Google Search Console / GSC).

UI/UX & Design Systems

User Interface (UI) & User Experience (UX) Design · Figma (Design Tokens, Variables, Auto-layout, Component Systems) · Interactive High-Fidelity Prototyping · Conversion Rate Optimization (CRO) & Accessibility.

Frontend, AI & Visual Engineering

Frontend Web (HTML/CSS/JS, TypeScript, Next.js, Tailwind CSS) · Backend & Vector Search (Python, Supabase, pgvector, FAISS) · AI Coding Tools & Multimodal Workflows (Gemini/Claude API, ComfyUI, CLIP) · Visual & Print Systems (Adobe CC, HDR Photography, Packaging Dielines).

EXPERIENCE — CONTINUED

3D Tile Mural & Prepress Designer

Đức Phát — 2017 — 2022

- Designed market-leading 3D wall tile murals and custom architectural feature walls tailored to regional buyer preferences, enabling the factory to onboard new distributor agencies and increase sales revenue.
- Built a 5-year foundation in industrial color management and material surface calibration across ceramic tile, tempered glass, and PVC substrates, ensuring 1:1 visual fidelity from digital canvas to physical product.

Visual Photographer & Retoucher

Viễn Đông Studio — 2017 — 2018

- Conducted client consultations, directed studio/location shoots, and built batch Lightroom/Photoshop color-grading pipelines to deliver 100% of print-ready albums on schedule.

PROJECTS

Case studies combining User Experience (UX) design in Figma with production code in TypeScript and Python. Full UX Case Studies at quang-seven.vercel.app & github.com/quang507.

NhaDat Radar — AI Property Aggregator & Marketplace · nhadatradar.com

Mapped buyer search flows and built a Next.js 15 marketplace where Playwright crawlers aggregate 5 listing sources twice daily, a Gemini AI pipeline cleans unstructured text and flags inflated pricing across 7,700+ listings, paired with PostGIS map filtering and pgvector semantic search.

Figma · Next.js 15 · TypeScript · Supabase (PostGIS, pgvector) · Gemini API · Playwright

GÓI — Packaging Brand, Commercial Web & AI Quoting Bot · goi-v2.vercel.app

Designed the design system, 3D box mockups, and an 11-page responsive site in Figma and shipped it to production; integrated a Python/Gemini quoting bot that translates plain-Vietnamese customer specs into exact factory costing validated across 1,400 sample orders.

Figma · HTML/CSS/JS · Python · Gemini API · Vercel

Finding Picture — Semantic Visual Search App · Finding-picture

Engineered an internal search interface indexing 10,000+ studio and architectural photos by visual content, composition, and objects via CLIP embeddings and FAISS (<2s query time), replacing manual folder browsing for designers and marketers.

Python · Streamlit · CLIP · FAISS · YOLO

Vietnamese Sign Language (VSL) — Browser AI Trainer · VSL

Designed the learning user flow and built a zero-latency browser web app using webcam hand-tracking to score sign language gestures in real time, complete with custom dataset curation and model training.

Next.js · MediaPipe · TensorFlow.js · Python

Scripted AI Video Production Pipeline · Flow · Seedance

Developed a storyboard-to-screen workflow combining Google Flow (Veo) and Seedance with Premiere Pro color grading and sound design to produce character-consistent commercial short films.

Flow (Veo) · Seedance · ComfyUI · Premiere Pro · After Effects

Site Gate Vehicle Monitoring System · internal

Built an offline computer-vision pipeline on a 4G site camera that groups frame sequences into vehicle entry/exit events, dispatches shift reports to Telegram, and self-retrains on staff-verified logs.

Python · ONNX Runtime · RF-DETR · SQLite

Additional shipped products: Zalo chat-first property assistant with Next.js CRM, QR maintenance & resident rating web app for a 50-unit compound, automated stock screener bot, and specialty coffee landing page.

EDUCATION & TRAINING

University of Transport and Communications — HCMC Campus

Construction Economics & Engineering Foundation · 2014 — 2016

2-year foundation in engineering mathematics & spatial technical drawing; transitioned full-time into commercial design & software product building from 2017. Continuous professional training in UX Psychology (Hook Model, Usability Testing), Figma Design Systems, and AI Engineering.
