PROFILE

I work on both ends of visual production: I shoot the source material and design what is built from it. Eight years took me from 3D tile murals for high-end interiors, through a wedding studio, to my current role — owning all visual output for two residential developments at Nhã Đạt: architectural photography, video, every piece of print and digital collateral, a 10,000-file media library, and press supervision through to the finished product. I build AI into the production pipeline — generating and retouching stills with ComfyUI and Omni, and producing scripted video with Flow and Seedance — alongside writing small production tools that cut manual steps out of the workflow: a print-quoting bot, a property listing engine and a content-based search over my own image archive.

TOOLS

> Photoshop · Lightroom · Camera Raw · Illustrator · InDesign · Figma · Premiere Pro · After Effects · ComfyUI · Flow (Veo) · Seedance · Kling · Python · Next.js · TypeScript · Supabase

EXPERIENCE

Designer & Photographer

Nhã Đạt — Residential Property Developer 2025 — present

- Concept and design of all campaign material for two residential developments — Ny'ah Phu Dinh, a 50-unit compound, and Villa Ny'ah: Instagram sets, PDFs, brochures, banners, posters, labels, backdrops, standees and display units.
- Architecture, product and event photography; retouching, video editing and post for web, Facebook and YouTube.
- Work alongside marketing to build 2D and 3D layouts for each channel.
- Run and supervise production — direct contact with printers, colour control and finishing.
- Organise, tag and maintain an image archive of roughly 10,000 files; built an internal sales chatbot and a content-based image search tool on top of it.
- Contribute ideas and support the content, video and marketing teams on campaign material.

Agricultural Trainee

Axel Månsson A/S — Denmark May 2024 — Sep 2025

- 16 months inside a high-technology Danish farming operation, working in English to international process and safety standards.
- Shot photo, video and drone documentation of the production site; handled part of the record keeping and operational data logging.

SKILLS

Design
Photoshop · Illustrator · Figma · InDesign. Print and digital collateral, 2D/3D layout, print colour management.

Photography
Architecture · product · events · weddings. Post-production and retouching in Lightroom and Camera Raw. Drone.

Video
Premiere Pro · After Effects. Editing, assembly, grading and basic motion graphics.

AI for image & video
ComfyUI, Kling and Omni for stills; Flow (Veo) and Seedance for scripted video. Tools connected over MCP to automate the pipeline.

Production & asset management
Tagging, naming and archiving image libraries. Print and finishing supervision. Event coordination.

Technical
Python · TypeScript · Next.js · Supabase/Postgres · HTML/CSS/JavaScript. Gemini and Claude pipelines, vector search, on-device vision models (CLIP, YOLO, ONNX).

EXPERIENCE — CONTINUED

Graphic Designer
Piramic Saigon — 2022 — 2024

- Graphic design and brand collateral; print file preparation and colour control before production.

Tile Mural & Print Designer
Đức Phát — 2017 — 2022

- Designed 3D tile murals and decorative wall panels for construction projects and high-end villas.
- Five years working close to the press and to material finishing — the foundation of how I control print colour today.

Photographer
Viễn Đông Wedding Studio — 2017 — 2018

- Studio and location wedding photography; retouching, editing and album delivery to clients.

SELECTED PROJECTS

Scripted AI video · Flow · Seedance

Short films and ad cuts written as a script and shot list first, generated in Google Flow (Veo) and Seedance, then assembled, graded and mixed in Premiere Pro. I tune prompts and shot continuity so the generated footage cuts together as one piece instead of a set of unrelated clips.

Flow (Veo) · Seedance · Premiere Pro · After Effects

GÓI — packaging brand, site and quoting bot · goi-v2.vercel.app

Full identity and eleven-page commercial site for a paper-packaging print works, built out of my own Figma file: brand, product photography and box mockups. Paired with a bot that reads a customer's spec in plain Vietnamese and quotes it on the factory's real costing — paper weight, pieces per sheet, plate and press runs — tested against 1,400 sample orders.

Figma · HTML/CSS/JS · Python · Gemini · Vercel

NhaDat Radar · nhadatradar.com

A property marketplace that is also an aggregator: crawlers pull five Vietnamese listing sources twice a day, then a Gemini pipeline strips junk, extracts price, area and ward from free text, flags inflated prices and separates owners from brokers. On top sit map and semantic search, AI valuation, saved-search alerts and a seller dashboard.

Next.js 15 · TypeScript · Supabase (PostGIS, pgvector) · Gemini · Playwright

Finding Picture · Finding-picture

Search a local archive of roughly 10,000 stock files by what is in the picture — subject, style or objects — instead of by filename. Built out of my own need to manage the image library at work.

Python · Streamlit · CLIP · FAISS · YOLO

Vietnamese Sign Language · VSL

A web app for learning Vietnamese Sign Language: the learner turns on the camera, signs, and is scored in real time. Runs entirely in the browser with no server, and includes the data pipeline and model training.

Next.js · MediaPipe · TensorFlow.js · Python

Gate monitoring · private

A 4G site camera feeding an offline detector that groups frames into one vehicle movement, infers in or out, logs it and reports each shift to Telegram — then retrains itself on the records staff confirm.

Python · ONNX Runtime · RF-DETR · SQLite

Also public: a chat-first property assistant running over Zalo with a Next.js CRM behind it, a sales chatbot in daily use, a QR-based maintenance and rating app for the 50-unit compound, a stock screener bot and a coffee-brand landing page.

EDUCATION

University of Transport and Communications, HCMC campus

Construction Economics · 2014 — 2016

Two years completed

LANGUAGES

Vietnamese

Native

English

IELTS 5.5 · used daily at work and for 16 months living in Denmark
